

## Day 4

### Test Case

Process	Step to Execute	Expected Results
Search Return	1. Navigate to Systems section, returns Option 2. Choose Return Reasons 3. Search for the text "order"	Verify the search is displayed data with "order" keyword or not and when no match check the "No matching records found"

#### Steps Executed:

- ✚ Login to the admin page with given username and password and click on the 'Login' button.
- ✚ Once logged in click on the 'System' and then 'Return' and then to 'Return Reason'
- ✚ Search for 'Order' and see whether any data is present with this keyword.

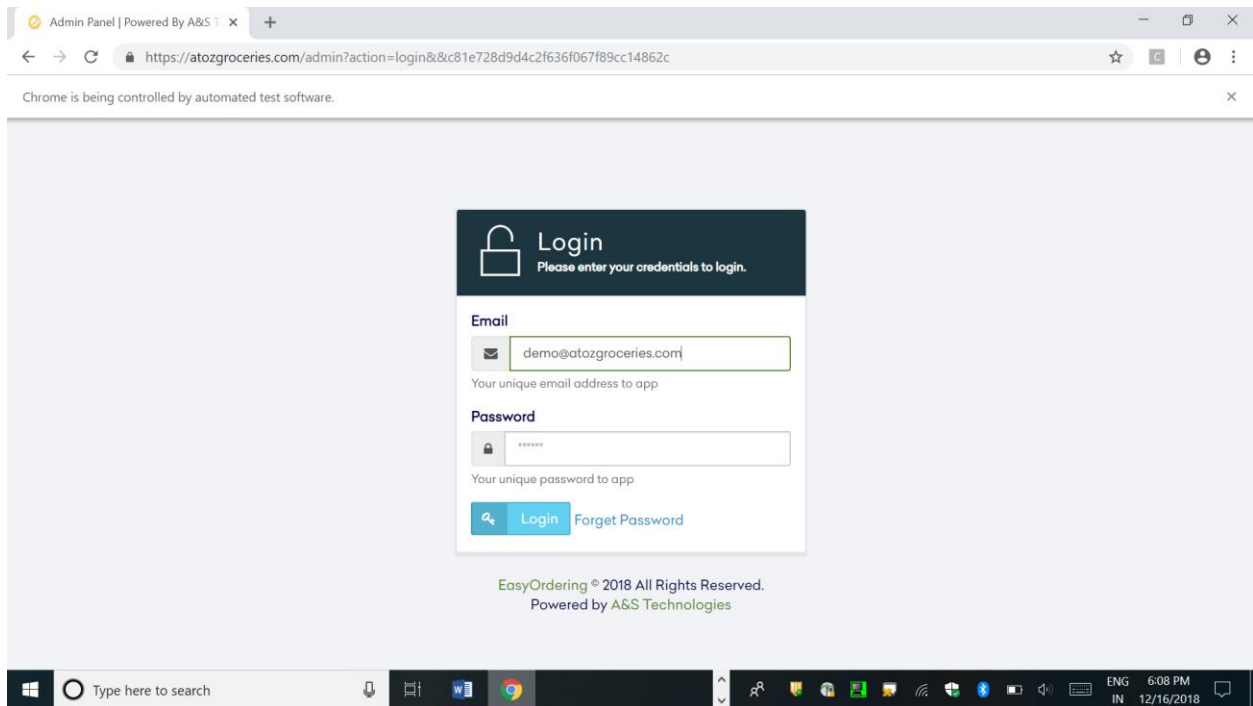

#### Program Code:

##### Base Test Java:

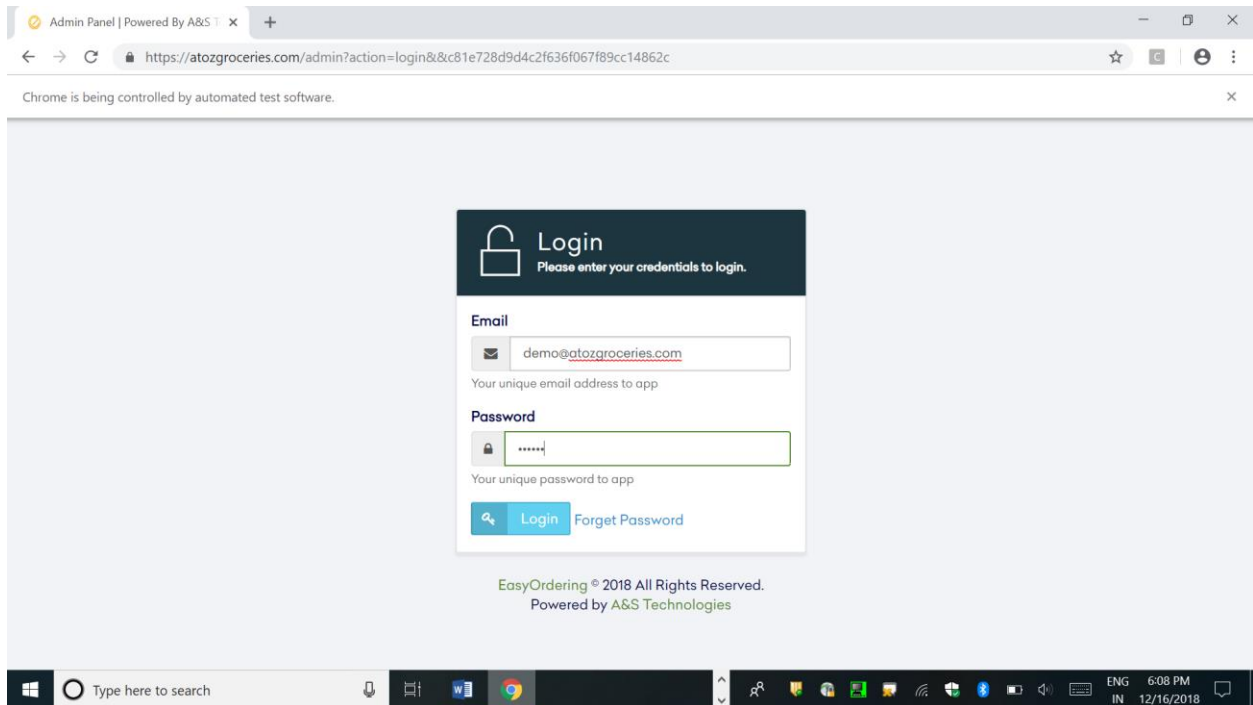

```
@Test(priority = 1, testName = "Return Sales")
public void SalesReturnTab() throws IOException, InterruptedException {
    String url = data.get("url");
    String userName = data.get("username");
    String password = data.get("password");
    String search=data.get("Search");
    driver.get(url);
    //To get the method created in Admin page
    AdminPage home = new AdminPage(driver, wait);
    //To get the mail id or user name
    home.EnetrEmailAddress(userName);Thread.sleep(2000);
    //To give to password
    home.EnetrPassword(password);Thread.sleep(2000);
    //To give the password
    home.ClickonLoginButton();Thread.sleep(2000);
    //To click on 'System Options' tab
    home.ClickOnSystemOptions();Thread.sleep(2000);
    //To click on 'Return'under 'System' tab
    home.ClickOnReturn();
    //To click on 'Return Reason' under 'Return'
    home.ClickOnReturnReason();
    //To search for 'order' under 'Return Reason'
    home.EnterSerachEle1(search);
    //To check whether the search with 'order' is present or not
    WebElement
order=driver.findElement(By.xpath("//table[@id='dataTableExample2']/tbody/tr[1]/td[2]
"));
    String orders=order.getText();
    System.out.println(orders);
}
```

## Output from webpage:

\*Enter the username

\*Enter the password and click on login button

\*Click on 'System'

The screenshot shows the 'Return Reasons' admin panel. The left sidebar contains a menu with the following items: Dashboard, Catalog, Sales, Customers, Marketing, and System. The 'System' menu is expanded, showing sub-items: Settings, Users, Shipping, Order Statuses, Weight Class, and Return. The 'Return' item is highlighted. The main content area is titled 'Return Reasons' and contains a 'Return Reason List' table. The table has columns for '#', 'Return Reason Name', and 'Action'. There is one entry in the table with the number '3' and the name 'Order Error'. The 'Action' column for this entry has a dropdown menu labeled 'Action'. Above the table, there are controls for 'Show 10 entries', export options (Copy, CSV, Excel, PDF, Print), a search bar with the text 'Order', and pagination controls (Previous, 1, Next). The top of the page shows the 'easyordering' logo and a 'Logout' button. The bottom of the page shows the Windows taskbar with the search bar and system clock.

### \*Search for 'order' in 'Return Reason'

The screenshot shows the 'Return Reasons' admin panel. The search bar at the top right contains the text 'order'. Below the search bar, a table titled 'Return Reason List' displays the search results. The table has three columns: '#', 'Return Reason Name', and 'Action'. There is one row in the table with the following data:

#	Return Reason Name	Action
3	Order Error	Action

The 'Action' column for the 'Order Error' row contains a dropdown menu labeled 'Action'. The table also includes pagination controls at the bottom right, showing 'Previous', '1', and 'Next'.

### \*Output from eclipse

The screenshot shows the Eclipse IDE console output for a Selenium test run. The output includes the following information:

- Test results for 'Default test': Tests run: 1, Failures: 0, Skips: 0
- Test results for 'Default suite': Total tests run: 1, Failures: 0, Skips: 0
- Test name: Order Error
- Test status: PASSED: SalesReturnTab

The console also shows the Selenium WebDriver version (6.14.3) and the ChromeDriver version (2.44.609538).
